

# DATA PRO

## MONITOR YOUR BARN ANYWHERE IN THE WORLD

Data Pro upgrades your legacy controller into a **Smart Monitoring System**. Digital alerts are sent to you and your maintenance team, **preventing loss** to your animals and equipment while optimizing production.

- Remote Monitoring & Custom Alert System
- Collects & reports data from all equipment, controllers & sensors (generic, legacy and new)
- Dashboard displays sensor data in form of graph and chart on your mobile device
- Sets thresholds with conditional alerting

---

### COMPATIBLE

Monitors systems such as Phason, Gensets, EBX, Cumberland TC4, Single Purpose Controller Scraper, Feedline, Doors, and all other controllers and sensors.

### CONVENIENT

DataPro is supported and serviced by the AgriHub Family of Companies.

### COMPREHENSIVE

Provides **digital reports & alerts** to your smart device for doors, lights, temperature, water pumps, fridges, manure systems, defective fans and more.

## REMOTELY MONITOR

DataPro provides you with the ability to remotely monitor your barn from your smart device, anywhere, anytime.

## PEACE OF MIND

Ability to set up custom alert functions, giving you remote insight into areas of the barn you were not previously able to view.

## EXPEDITE TROUBLESHOOTING

Identify potential problems before they arise, saving you and your animals from an unplanned event.

## CREATE A SMART BARN WITH THE DATAPRO

### MULTIPLE SYSTEMS, A SINGLE DATA HUB!

- Custom reporting on an easy to read dashboard
- Connect to Legacy controllers and other systems
- No new hardware needed for additional sensors
- Monitoring/Alerts
- Data Analytics
- All farms, all buildings, one spot
- Applicable for laboratories, industrial buildings, processing plants and agricultural facilities
- Low and high volt connectivity
- Cell phone or wifi connection required

### ELECTRICAL FAULT MONITORING

Reduce Your Risk Of A Fire Event

### CUSTOM ALERT SYSTEM

Using Persistent Notifications

### VISIBILITY TO YOUR EQUIPMENT USING PREDICTIVE MAINTENANCE. DASHBOARD CAN SHOW

Utilities Usage like propane and water  
Ventilation Run Time  
Gensets status  
Static Pressure

### COLLECT, REPORT & DISPLAY

All Controller & Sensor Data Using Charts/Graphics

### NEEDS A SENOSR

Add a temp, NH3 or any compatible wireless sensor as a standalone option or connected to your controller
