

LAGOONPRO

TROUBLESHOOT FROM A DISTANCE

WHAT IS LAGOONPRO?

- Brings your legacy lagoon controller **online**
- Provides **remote insight** into the lift station performance
- View **statuses and levels** of your lagoon
- Take the **guesswork out** of equipment monitoring

SAVE TODAY TO PAY FOR TOMORROW.

Simply put, LagoonPro gives you remote access to your Lift Station controller like you've never seen before. Tapping directly into the brain of the Lagoon system, LagoonPro provides equipment and sensor visibility, data logging and monitoring from anywhere.

Integrating LagoonPro into your Lift Station Controller also provides remote access to your Service Team, so they can diagnose, root cause and potentially fix a problem off-site. For live stock producers who seek value from their equipment, LagoonPro is the solution to unlocking your data & getting informed in real time on the status of your system.

FEATURES

- Monitor Lagoon Remotely
- Check status of pumps, lift stations and more
- Enables Farm to catch potential issues before breakdowns occur
- Expedite troubleshooting by providing remote insights to Technicians
- Brings your legacy lagoon controller online
- Alerts via your smart device

LAGOONPRO

REMOTELY MONITOR

Check the status of your manure management system from your phone, tablet or computer, no matter the time of day.

PREVENTATIVE MAINTENANCE

Catch breakdowns before they are urgent.

EXPEDITE TROUBLESHOOTING

Without needing to be physically on-site, technicians can verify the issue from the shop, ensuring the proper parts are readily available for your repair.
